## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4, 6-13 and 45-51 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 and 6-13 of copending Application No. 09/287,673. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application claims a nonwoven fabric formed on a three-dimensional image transfer device that includes all the limitations of the nonwoven fabric of the copending application.

Regarding claims 47-51, it is well settled that the mere duplication of parts has no patentable significance unless a new and unexpected result is produced. *In re Harza*, 124 USPQ 378 (CCPA 1960).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 76-92 are allowed.

Art Unit: 1771

4. The following is a statement of reasons for the indication of allowable subject matter: claims 76-92 are allowed since the prior art of record fails to teach the bonding of the multi-component fibers prior to hydroentanglement. Further, the prior art of record fails to teach a nonwoven fabric with the particular claimed interengaged packed loops that have been defined by the Applicant to be continuous filaments with a physical bonding characterized by complex meshed coils, spirals and loops having a high frequency of contact points, providing high elongation values. The Applicant further characterizes the packing of the filaments as substantially free of loose filament ends.
